Comments from Microsoft on norms text

15:25 UTC

Open discussion with participants:

- 1) In the non-paper, there is guidance for the implementation of the eleven agreed norms. Are there any elements missing in this guidance?
- 2) The focus so far in the non-paper is on the 11 agreed norms, but are there other issues that should be considered?
- 3) What challenges do you see in taking forward the proposals included in the non-paper, including in any of the relevant norms guidance text?
- 4) With respect to the draft “Norms” section of the OEWG the pre-draft report, are there any notable omissions, additions, or statements with which you support or disagree? (see paragraphs 38-44) In particular, do you think there is sufficient reference to non-governmental stakeholder engagement? If not, how could this be improved?
